

# TECHNOLOGY LESSON PLAN

- **Independent 1** ●  
**Unit 1 - Color**

*(Lesson 1A)*

- **Objectives**

*Talk about what people do for  
Valentine's Day*

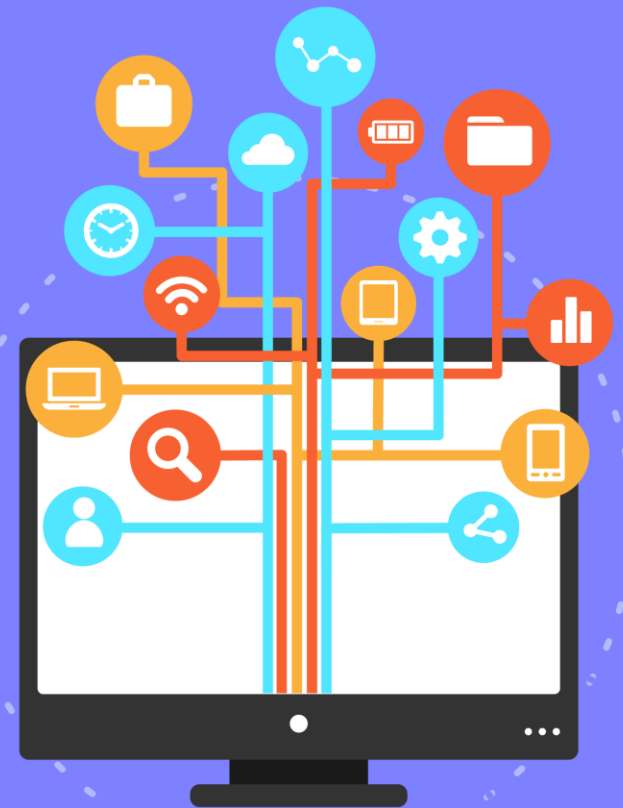

# TECHNOLOGY LESSON PLAN

## ➤ *Pre*

Use the X-Class to organize groups of two. Once the groups have been organized, ask them to go to google and do some research on the important *holidays* we have in February. Now, have students open a google document so they can share the information later on with the answer to the following questions:

- *Do Colombians celebrate any of these holidays?*
- *What kind of activities do people do for Valentine's Day?*
- *What color do you think represents Valentine's Day and why?*

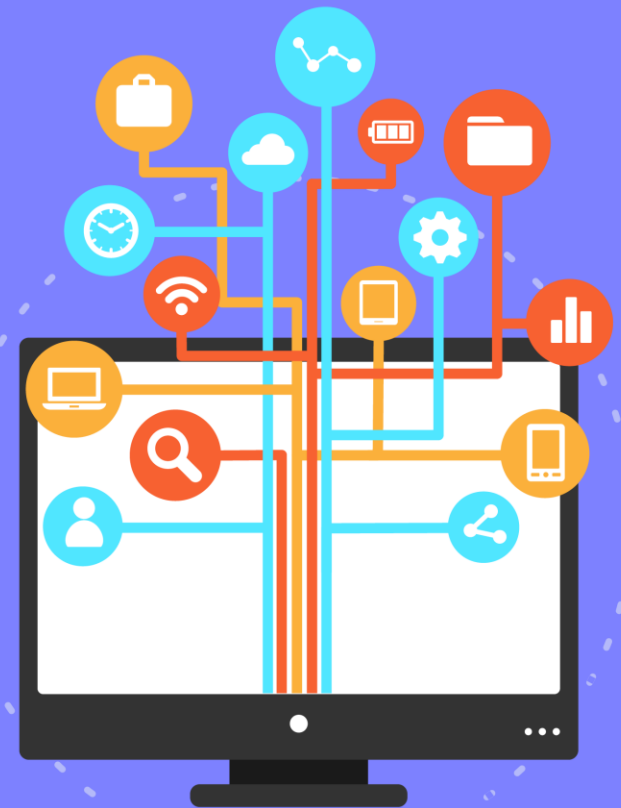

# TECHNOLOGY LESSON PLAN

## ➤ *While*

Ask students to watch the video On the weebly section about special holidays. [The History of Valentine's Day with Listening Activity](#). Once they've finished, ask them to share some of their answers by using the *student show option* from the X-Class.

Tell students were going to watch another video where they will have the chance to hear some people talking about their valentine's day activities [Valentine's Day ESL-ified](#) Make sure students follow instructions and pay extra attention on the use of *simple present and present continuous tense*.

Allow students to watch the video more than once in case the information was not clear enough.

# TECHNOLOGY LESSON PLAN

## ➤ *Post*

To finish with this lesson, students are going to work in pairs and each groups is going to investigate about a different country and the way they celebrate valentines day here. Once they have done some research about the topic, students are going to use the website *Big Blue Button*, to create an open forum where they will explain their research by following the example from the previous exercise.
