# TECHNOLOGY LESSON PLAN

● *Fundamental Plus 3* ●
● *Unit 8 – Appearance* ●

(Lesson B)

● *Objectives* ●
Describe appearance - Identify people
Discuss actions that are happening now
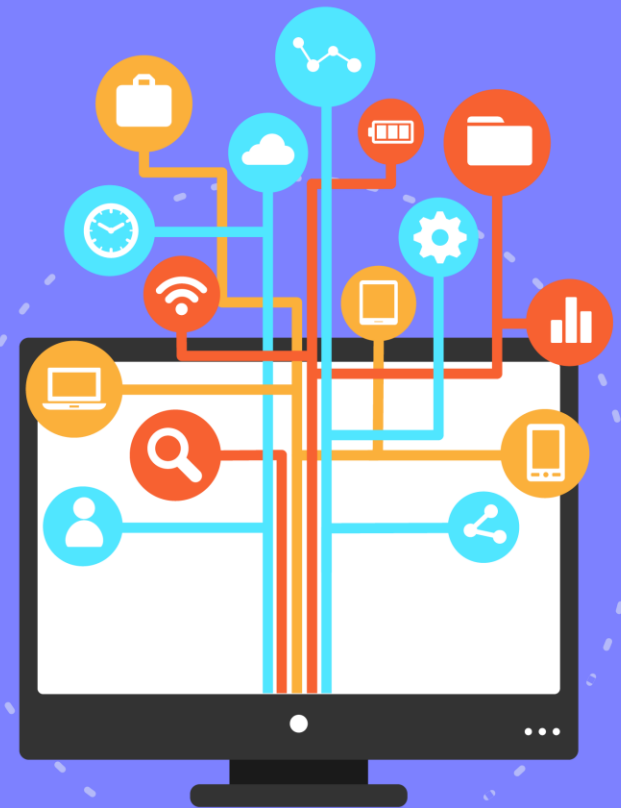

TECHNOLOGY LESSON PLAN

Warm up

As we are introducing the topic about fashion, the students are going to answer the following question:

- Is fashion important for you in life?

- Does actual fashion make you feel comfortable with your appearance?

After the students have answered the questions, please ask them to look for clothes they like to wear and with the tool *Student Show* from ***Xclass***, check the pictures they found and ask them why they chose those clothes.

Pre

- After the discussion, we are going to introduce some pictures from trendy clothes (you can get pictures from Google or fashion pages that they maybe know ex: Calvin Klein, Versace, etc.) and the teacher starts asking if they like it or not and give the reason why.

TECHNOLOGY LESSON PLAN

While

- To make a review of vocabulary about clothes, we are going to use a **Kahoot** quiz to know how well they know the words. A sample quiz that you can try: https://create.kahoot.it/details/clothes/494eb9dd-3d9f-4d40-853e-df2d83d0f239

- To use **Kahoot**, you have to create an account. It is not necessary to make your own quiz, there are lots of quizzes in there from the same topic.

Post

- They are supposed to bring a picture of themselves for the class wearing some clothes, the idea is that they put the picture in a Power Point Presentation to present it to the class. They have to say what they are wearing and what is the reason they used those clothes. They can share it with the teacher and classmates using the *Xclass* function *File Transfer.*
